Setting up Multi-Factor Authentication optional

Do you want to set up multi-factor authentication?

zaznaczamy

Multi-factor authentication enhances security by requiring the input of a verification code in addition to a password when logging in. Setting up multi-factor authentication is optional, but if you set it up, even if your password is known to someone else, you can avoid the risk of unauthorized login. To use multi-factor authentication, you need to install any time-based one time password (TOTP) authentication app.
